Product description

Volantex RC BF-109 with Xpilot One Key Aerobatic Stabilization System Perfect for Beginners 761-11 RTF

RTF version of the plane, the model includes all the components necessary for flight such as motor, regulator, servos, battery, charger, transmitter and receiver. You will need to buy 4 AA batteries to power the transmitter.

KEY FEATURES
Built-in gyroscope
3-level flight control assistant
Easy aerobatics with One Key function
Propeller protection system
4 channel model version

Volantex RC BF-109 761-11 is a small aircraft with excellent performance. Thanks to the integrated Xpilot gyro stabilizer system with a powerful motor, the plane flies stably, agilely and can perform aerobatics. It is equipped with aerobatics function, just press one button and pull the stick to easily control the BF-109 and perform aerobatics. The 3-level flight control assistant (beginner level with full assistance / intermediate level with partial assistance / expert in manual control) helps beginners learn to fly step by step. Control apparatus range about 200m, flying time on 1 charge up to 10 minutes. Translated with www.DeepL.com/Translator (free version)
